

Oral mental starters (ongoing, throughout the term):

- Count from (and back to) 0 in multiples of 3, 6, 4, 8, 25, 50, 100
- Recall and use multiplication and division facts for the 2, 3, 4, 5, 6, 8 and 10 times tables (up to the 12th multiple)
- Recognise and use inverse operations and commutativity to derive other related facts e.g. $4 \times 6 = 24$ to calculate $6 \times 4 = 24$; $24 \div 6 = 4$; $24 \div 4 = 6$
- Compare and order numbers up to 1000 and beyond
- Derive addition and subtraction facts for all pair of numbers that total 100 (refer to 100 square)
- Derive addition and subtraction facts for multiples of 100 to 1000 (e.g. $700 + 300 = 1000$)
- Given a number, say/identify the number that is 100 more or less within 1000 (and beyond)
- Mentally add and subtract three-digit numbers and ones or tens or hundreds up to and including 1000
- Find doubles of all two-digit numbers and corresponding halves (using knowledge of place value and partitioning)
- Find doubles of three-digit multiples of ten and corresponding halves e.g. double 240 = 480; half of 480 = 240
- Count forwards and backwards using simple fractions
- Tell the time to the nearest minute on an analogue clock (including using Roman numerals I-XII) and relate to 12 hour digital clocks
- Convert between different units of measurement e.g. cm to m, minutes to hours
- Identify, name and describe 2D and 3D shapes

NB Also see the **Mental Maths Policy** for further guidance

| | | | |
|--------------------------------------------|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Number</p> <p>Multiplication</p> | <p>5</p> | <p>Recall and use multiplication facts for the 2, 3, 4, 5, 8 and 10 times tables to the 12th multiple</p> <p>Through doubling, connect the 3 and 6 times tables Count in multiples of 3 and 6, forwards and backwards Recall and use multiplication facts for the 6 times table</p> <p>Write and calculate mathematical statements for multiplication using the 6 times table (and other known tables); solve missing number problems (empty boxes)</p> <p>Consolidate the partitioning method (using the distributive law) to multiply a teen number by a one-digit number e.g. $16 \times 5 = 80$ (See Y3 in Calculation Policy); extend with other two-digit numbers multiplied by a one-digit number e.g. $24 \times 6 = 144$</p> <p>Consolidate using the grid method and/or the expanded method to multiply a teen number by a one-digit number; extend with other two-digit numbers multiplied by a single digit number</p> <p>Solve word problems that involve multiplication e.g. There are 14 cherries in each bowl. I have six bowls of cherries. How many cherries do I have altogether?</p> | <p>Multiply, multiplication, times Partition, value, tens, ones/units Grid method, expanded method</p> <p>Problem, calculation, solution</p> |
| <p>Number</p> <p>Division</p> | <p>5</p> | <p>Recall and use division facts for the 2, 3, 4, 5, 8 and 10 times tables to the 12th multiple</p> <p>Through doubling, connect the 3 and 6 times tables Count in multiples of 3 and 6, forwards and backwards Recall and use division facts for the 6 times table</p> <p>Write and calculate mathematical statements for division using the 6 times table and other known tables; solve missing number problems (empty boxes); use the inverse operation to check answers</p> <p>Consolidate the formal layout for division using known times tables (See Calculation Policy)</p> <p>Introduce remainders, using the formal written layout, with known times tables e.g. $25 \div 8$; illustrate remainders using an empty number line to ensure understanding (See Calculation Policy)</p> <p>Solve word problems, which involve division with and without remainders, using the formal written layout (using known multiples) e.g. I have 32 cherries and I share them equally between four friends. How many cherries do they each have? I collect 19 eggs from my hens and put them into boxes of six. How many full boxes of eggs do I have and how many eggs are left over?</p> | <p>Divide, division Formal layout $\overline{)}$ Remainder Inverse</p> <p>Problem, calculation, solution</p> |

| | | | |
|----------------------------------------------------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Number</p> <p>Fractions</p> | <p>5</p> | <p>Continue to recognise fractions in the context of parts of a whole, of numbers, measurements, shapes and of quantities; use the terms numerator and denominator; write fractions (unit fractions and non-unit fractions) using notation and words</p> <p>Count forwards and backwards using simple fractions, going beyond one e.g. using a counting stick to count in thirds: $1/3$, $2/3$, $3/3$, $4/3$, $5/3$ (if appropriate refer to mixed numbers and improper fractions – taken from Y5 programme of study)</p> <p>Connect finding a unit fraction of a number with division e.g. one tenth of 80 is 8 because $80 \div 10 = 8$, $1/6$ of 18 is 3 because $18 \div 6 = 3$</p> <p>Find non-unit fractions of numbers and quantities (where the answer is a whole number) using diagrams and resources to support e.g. $3/4$ of 20 = 15; $2/3$ of 12 = 8</p> <p>Recognise and show, using diagrams and fraction walls, families of common equivalent fractions e.g. $1/2 = 2/4 = 4/8$, $1/3 = 2/6 = 3/9$</p> <p>Solve problems involving unit and non-unit fractions e.g. There are 30 plums in a bowl and I eat $1/5$ of them. How many plums are left in the bowl? I have 12 cherries and I give three quarters of them to my friend. How many do I give him? How many do I have left? There are 20 children at a party. $2/5$ of them are boys. How many boys and how many girls are at the party?</p> | <p>Whole Unit fraction, non-unit fraction Numerator, denominator Equivalent fraction Mixed number, improper fraction</p> |
| <p>Measurement</p> <p>Time</p> <p>Money</p> | <p>3</p> <p>2</p> | <p>Consolidate writing and telling the time to the nearest minute using an analogue clock (including using Roman numerals) and digital clock (12 hour); convert between analogue and digital clocks (12 hour); continue to use a.m./p.m.</p> <p>Introduce 24 hour digital clocks; convert between 12 hour digital clocks and 24 hour digital clocks</p> <p>Know the number of seconds in a minute, minutes in an hour, hours in a day, days in a week, months in a year; days in a year (including leap years)</p> <p>Solve problems involving converting from one unit of time to another e.g. How many minutes are there in three hours? The swimming pool was closed for six weeks. For how many days was it closed? My niece is 3 years old today. How many months old is she?</p> <p>Consolidate pound and pence and the relationship between them ($\pounds 1 = 100\text{p}$; $\pounds 2 = 200\text{p}$ etc)</p> <p>Use decimal notation to record money e.g. $105\text{p} = \pounds 1.05$, $245\text{p} = \pounds 2.45$</p> <p>Add and subtract amounts of money in real life contexts, including giving change</p> <p>Solve problems/investigations involving money e.g. I have five coins in my pocket and they total $\pounds 1.25$. What could those five coins be? Is there more than one solution?</p> | <p>All relevant vocabulary from previous years relating to time and money, including:</p> <p>24 hour digital clock Leap year</p> <p>Pound pence Decimal point</p> <p>Problem, investigation, solution</p> |

|-----------------------------------------------------------------------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Measurement</p> <p>Length and Perimeter</p> | <p>3</p> <p>2</p> | <p>Consolidate understanding of metres (m), centimetres (cm) and millimetres (mm) as units of measurement and the relationship between units; convert between units of length e.g. $3\text{m} = 300\text{cm}$</p> <p>Use decimal notation for length e.g. $215\text{cm} = 2\text{m } 15\text{cm} = 2.15\text{m}$; $15\text{mm} = 1\text{cm } 5\text{mm} = 1.5\text{cm}$</p> <p>Estimate and measure using appropriate units and equipment, including mixed units of measurements, and record using decimal notation, in practical contexts</p> <p>Follow a line of enquiry relating to length e.g. my wrist measures less than my ankle. True or false? The length of my running jump is longer than my standing jump. How much longer is it? (Possible link to Science curriculum)</p> <p>Consolidate the understanding of perimeter as the distance all the way round the outside Measure the perimeter of rectangles (including squares) using cm and m Calculate the perimeter of rectangles (where the length of the sides is given) Respond to questions relating to perimeter e.g. a square has a perimeter of 20cm. How long is each of the sides of this square?</p> | <p>Length, measure, ruler, tape measure mm, millimetre, cm, centimetre, m, metre</p> <p>Perimeter</p> |
| <p>Number</p> <p>Addition and Subtraction (Mental Methods)</p> | <p>5</p> | <p>Consolidate understanding that addition and subtraction are inverse operations</p> <p>Derive addition and subtraction facts for all pairs of numbers that total 100 (refer to 100 square) e.g. $48 + 52 = 100$; $100 - 52 = 48$; derive addition and subtraction facts for multiples of 100 to 1000 e.g. $600 + 400 = 1000$, $1000 - 400 = 600$ Begin to derive addition and subtraction facts for multiples of 50 to 1000 e.g. $450 + 550 = 1000$, $1000 - 750 = 250$</p> <p>Solve missing number problems using number facts, inverse operations and place value e.g. $\square + 67 = 100$; $1000 - \square = 700$; $850 + \square = 1000$</p> <p>Use partitioning to add and subtract (mentally) three-digit numbers and tens within 1000 Use partitioning to add and subtract (mentally) three-digit numbers and hundreds within 1000</p> <p>Solve word problems involving addition and subtraction, using mental methods (as above) and known facts</p> | <p>Inverse</p> <p>Digit Hundreds, tens, ones/units</p> <p>Addition, plus, altogether add, sum of, total, increase, more than</p> <p>Subtraction, subtract, minus, decrease, less than</p> <p>Calculate, calculation</p> |

Medium Term Plans for Mathematics (aligned with the 2014 National Curriculum) - Year Four (Autumn Term)

| | | | |
|--------------------------------------------------------------------------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Statistics</p> <p>Data handling</p> | <p>5</p> | <p>Collect, present and interpret discrete data using tallies, bar charts, pictograms and tables; use a range of scales</p> <p>Solve problems using information presented in bar charts, pictograms, tallies and tables including comparison, sum and difference problems e.g. How many more children in Year 4 walked to school than came by bus? How many children were asked altogether?</p> <p>Collect, present and interpret continuous data to show changes over a period of time e.g. use a line/time graph to show the temperature in the classroom throughout the day at hourly intervals or the height of a bean stalk over a period of time</p> <p>Follow a line of enquiry e.g. record the temperature in your classroom at intervals throughout the week. Are the mornings warmer or cooler than the afternoons? (Possible link to Science Curriculum)</p> | <p>Table, tally chart, bar chart, pictogram Data Scale, interval Line graph/ time graph</p> <p>Temperature, degrees, Celsius, ° C</p> |
| <p>Number</p> <p>Multiplication and Division (Mental Methods)</p> | <p>5</p> | <p>Recognise and use the inverse relationships between multiplication and division and use this to solve missing number problems involving multiplication and division facts</p> <p>e.g. $6 \times \square = 24$, $24 \div \square = 6$</p> <p>Find factor pairs of numbers using known multiples e.g. A factor pair of 18 is 3 and 6 (because $3 \times 6 = 18$)</p> <p>Multiply numbers by ten (including numbers with one decimal place) e.g. $95 \times 10 = 950$; $4.2 \times 10 = 42$; describe the effect using the language of place value (See Mental Maths Policy)</p> <p>Divide numbers by ten (including answers with one decimal place) e.g. $820 \div 10 = 82$; $46 \div 10 = 4.6$; describe the effect using the language of place value (See Mental Maths Policy)</p> <p>Write and calculate mathematical statements for multiplication using all known tables and derive multiplication facts for multiples of ten times a one-digit number using mental methods e.g. $3 \times 6 = 18$; $30 \times 6 = 180$; $3 \times 60 = 180$ (See Mental Maths Policy)</p> <p>Write and calculate mathematical statements for division using all known tables and derive division facts for multiples of ten times a one-digit number using mental methods e.g. $30 \div 6 = 5$; $300 \div 6 = 50$; $300 \div 60 = 5$ (See Mental Maths Policy)</p> <p>Solve correspondence problems (n objects are connected to m objects) e.g. I have red wrapping paper and red ribbon, and green wrapping paper and green ribbon. How many different combinations can you find so that I wrap each present differently? What if I also have silver wrapping paper and ribbon? Record using a table and look for patterns and rules</p> | <p>Multiply, multiplied by, multiplication, product</p> <p>Divide, divided by, division</p> <p>Inverse operation Factors, factor pairs</p> <p>Place value, decimal place, place holder, decimal point</p> <p>Problem, solution, table, pattern, rule</p> |
