Medium Term Plans for Mathematics (aligned with the 2014 National Curriculum) - Year Five (Autumn Term)

Oral mental starters (ongoing, throughout the term):
- Identify multiples and count from (and back to) 0 in multiples of 2, 3, 4, 5, 6, 7, 8, 9, 10,11,12, 25, 50, 100 and 1000 (consolidation from previous years)
- Recall and use multiplication and division facts for the 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 times tables (up to the 12th multiple)
- Find all factor pairs of a given number
- Multiply and divide numbers mentally drawing upon known facts e.g. 7 x 6 = 42; 7 x 60 = 420; 420 ÷ 70 = 6
- Multiply numbers with up to two decimal places by 10 and 100 and divide corresponding numbers by 10 and 100
- Read, write, compare and order whole numbers up to 10,000 (and then 100,000)
- Read, write, compare and order numbers with up to two decimal places
- Recall and use addition and subtraction facts for multiples of 5 to 1000 (e.g. 485 + 515 = 1000, 1000 – 775 = 225)
- Given a number, say/identify the number that is 10/100/1000 more or less within 100,000
- Add three two- digit numbers together mentally (using jottings) e.g. 78 + 19 + 12 = 90 + 19 = 109
- Find doubles of four-digit numbers (using knowledge of partitioning and place value) and find corresponding halves
- Count forwards and backwards with positive and negative whole numbers, including through zero (refer to number line)
- Convert between different units of measurement e.g. km to m, cm to mm, ml to l, kg to g, hours to minutes, weeks to days
- Compare and order fractions whose denominators are all multiples of the same number (using diagrams, resources and fraction walls to support)

NB Also see the **Mental Maths Policy** for further guidance

Areas of Study	No of days	Statutory requirements and non-statutory guidance	Suggested Key Vocabulary
Number Number and place value	3-5	Read and write numbers to 10,000, then extend to 100,000 Given a number, say/identify the number that is ten, one hundred or one thousand more or less within 100,000 Order and compare numbers within 100,000 Round numbers within 100,000 to the nearest 10, 100, 1000 (extend to 10,000 if ready) Recognise the place value of each digit in a five-digit number Partition five-digit numbers into ten thousands, thousands, hundreds, tens and ones/units; continue to **use place value cards and charts to support**	Partition, Place Value Digit, number Units/ones, Tens, Hundreds, Thousands, Ten thousands Order Compare More than, Less than, <, > Round
Number Decimals	5	Consolidate tenths, hundredths and decimal equivalents e.g. 4 tenths = 0.4; 27 hundredths = 0.27 Introduce **thousandths** and relate them to tenths, hundredths and decimal equivalents 1/1000 = 0.001 (relate to measures e.g. ml and l, and use a place value chart to support) Recognise the place value of each digit in a decimal number with two decimal places and extend to	Partition, Place value Digit, number, decimal, decimal place, decimal point. tenth, hundredth,

(and place value)			numbers with up to three decimal places (tens, units/ones, tenths, hundredths, thousandths) Partition decimal numbers into tens, units/ones, tenths, hundredths and extend to thousandths; **use place value cards and charts to support** Round decimal numbers with one or two decimal places to the nearest whole number Compare and order decimal numbers with up to two decimal places and extend to three decimal places; relate to money or measures e.g. put these weights in order from lightest to the heaviest: 1.355 kg, 2.54 kg, 0.825 kg, 1.5 kg Solve addition and subtraction problems, using numbers with up to two decimal places and extend to numbers with up to three decimal places, in the context of money or measures	thousandth Order Compare More than, greater than, less than, <, > Round
Number Addition and Subtraction	5		Consolidate using the **formal written method of addition** to add two three-digit numbers Extend using the formal written method of addition to add two four digit numbers; decimal numbers, initially in the context of money and measures **(See Calculation Policy)** Consolidate the **formal written method of subtraction** to subtract two three-digit numbers Extend using the formal written method to subtract a three-digit number from a four-digit number; a four-digit number from a four-digit number; decimal numbers, initially in the context of money and measures **(See Calculation Policy)** Solve addition and subtraction one-step, two-step and multi-step word problems (including money and measures problems), deciding which operations to use e.g. A jug of juice contains 1,450 ml. I drink 335 ml and then accidentally spill 280ml. How much juice is left in the jug? There are 2540 people in the crowd at the football match and 870 are waiting to come in. What will the total number of people at the match be?	Digit, decimal Thousands, hundreds, tens, ones/units Tenth, hundredth, thousandth Addition, plus, altogether add, sum of, total, more than, increase Subtraction, subtract, minus, less than, decrease Calculate, calculation Problem, solution
Geometry Properties of 2D Shapes (Angles)	5		Consolidate acute, obtuse and right angles; estimate, compare and order angles; understand that an angle is a measurement of turn Know that angles are measured in degrees °; know that a right angle is a quarter turn and measures 90°; know that two right angles are half a turn and measure 180°; know that four right angles are one whole turn and measure 360° Introduce the **protractor** (including use of interactive resources); draw and measure given angles in degrees (to the nearest 5 degrees) Solve problems related to angles e.g. It is three o'clock on an analogue clock. What is the angle between the two hands? How many degrees has the minute hand turned after 30 minutes?	Acute, Obtuse, Right angle Degrees ° Quarter turn, Half turn, Whole turn Protractor

Produced for Southwark Primary Schools

Number				
Number Multiplication	5	Consolidate all mathematical vocabulary related to multiplication; introduce the term product e.g. What is the product of 7 and 8?		Multiply, multiplication, times, product
		Write and calculate mathematical statements for all multiplication tables; include multiplying by 0; solve missing number problems		Formal method of short multiplication
		Find all factor pairs of a given number; find all common factors of two numbers e.g. the common factors of 24 and 42 are 2, 3 and 6		Factor, Factor pairs
		Consolidate the **formal written method of short multiplication** to multiply a two digit-number by a single digit number and extend to a three-digit number by a single digit number **(See Calculation Policy for guidance on progression in methods)**		Calculation Problem, solution
		Solve word problems, which involve multiplication e.g. There are 132 cherries in a box. I have 6 boxes of cherries. How many cherries do I have altogether?		
Number Division	5	Write and calculate mathematical division statements for all times tables; solve missing number problems ; use the inverse operation to check answers		Divide, division Short division Formal layout ‾⟩
		Know and apply tests of divisibility for 2, 3, 4, 5, 10, 100		Remainder Inverse
		Consolidate the **formal method of short division** to divide a two digit number by a single digit number (and extend with a three-digit numbers by a single-digit number) with whole number answers e.g. 196 ÷ 7 = 28 **(See Calculation Policy)**		
		Use the formal method of short division to divide a two digit number by a single digit number and a three-digit number by a single-digit number with answers that contain **remainders**		Calculation Problem, solution
		Solve word problems, which involve division with remainders, using the formal written method of short division; begin to interpret remainders in context e.g. I need 96 tangerines for a party. The tangerines come in bags of 5. How many bags do I need? (round up) I am collecting vouchers for sports equipment. I get one tennis ball for every 8 vouchers. I have 115 vouchers. How many tennis balls can I get with my vouchers? (round down)		Round up Round down.

Number Fractions (including decimals)	5	Continue to recognise fractions in the context of parts of a whole, of numbers, measurements, shapes and of quantities; use the terms numerator and denominator; write fractions (unit fractions and non-unit fractions) using notation and words Count forwards and backwards in simple fractions Compare and order fractions whose denominators are all multiples of the same number using diagrams, resources and fraction walls to support Recognise mixed numbers and improper fractions in context and/or using diagrams; convert from one form to the other e.g. I have 3/5 of a mushroom pizza, and 3/5 of a tomato pizza. I have 6/5 (improper fraction) of a pizza altogether or 1 1/5 (mixed number) Identify, name and write equivalent fractions of a given fraction represented visually, including tenths and hundredths. Recognise and show equivalent fractions of a given fraction **using diagrams and fraction walls,** including tenths, e.g. 6/8 = 3/4 ; 2/10 = 1/5 Extend to equivalent fractions that are greater than 1 and are equivalent to an integer, e.g. 8/4 = 2, 12/4 = 3**;** relate to division Add and subtract fractions with the same denominator (using diagrams and fraction walls to support) e.g. 3/5 + 3/5 = 6/5 = 1 1/5 ; 7/8 – 3/8 = 4/8 =1/2 Read and write decimal numbers as fractions, e.g. 0.25 = 1/4; 0.5 = 1/2; 0.75 = 3/4; 0.1 = 1/10; 0.71 as = 71/100; 0.352 = 352/1000 Place fractions and equivalent decimals on a number line e.g. 0____1 or 0____2 (include improper fractions and mixed numbers)	Whole Unit fraction, non-unit fraction Numerator, denominator Equivalent fraction, mixed number, improper fraction Equivalent Tenth, hundredth, thousandth Decimal notation
Number Percentages	5	Introduce the term **percentage**. Recognise the per cent symbol (%) and understand that per cent relates to number of parts per hundred. Know where we use percentages in real life Write percentages as a fraction with denominator of 100 and as a decimal (use a hundred square to support understanding) 10% = 10/100 = 0.1, 1% = 1/100 = 0.01 etc. Know common fraction, decimal and percentage equivalents, e.g., 1/2 = 0.5 = 50%; 1/10 = 0.1 = 10% Solve simple percentage problems using knowledge of equivalent fractions and percentages, e.g. What is 50% of 120? How do you know? What is 10% of £120? How did you work it out? Place simple fractions, equivalent decimals and percentages on a number line. Know that fractions decimals and percentages are all ways of expressing proportions	Per cent %, Percentage Equivalent Proportion

Produced for Southwark Primary Schools

Measurement (Time) **&** **Statistics** (reading time tables)	3	Consolidate telling the time to the nearest minute on an analogue clock (including using Roman numerals) and on a digital clock **(taken from lower key stage 2 programmes of study)** Consolidate conversion between 12 hour and 24 hour digital clocks e.g. What time on the 12 hour clock is 13:50? What time on the 24 hour clock is 8:20 pm? **(taken from Y4 programmes of study)** Solve problems by converting between units of time, e.g. How many seconds in 10 minutes? How many minutes in 2½ hours?	All relevant vocabulary from previous years relating to time Duration, Timetable
	2	Read and interpret information in **timetables**, e.g. Use a **simple** train/bus timetable to ask and answer questions Complete a simple timetable with missing information, e.g. The bus takes 20 minutes between each stop. It leaves at 11:05. What time will I arrive at the third stop? Show this on the timetable	
Measurement Mass and capacity	5	Extend understanding of kilograms (kg) and grams (g) as units of measurement for **mass** using **practical** and **real life objects** e.g. Approximately, how much does a cat weigh? What unit of measurement would you use to weigh a tea bag? Use decimal notation for mass and convert between different units of mass e.g. 3.5kg = 3500g; 0.75 kg = 3/4 kg = 750g Estimate and measure mass using appropriate units and equipment, including mixed units of measurement, and record using decimal notation, **in practical contexts** Extend understanding of litres (l) millilitres (ml) as a unit of measurement for **capacity** using **practical** and **real life containers** e.g. Approximately, what is the capacity of this cup? What unit of measurement would you use to measure the capacity of the bath? Use decimal notation for capacity and convert between different units of capacity e.g. 3.5l = 3500ml; 0.75 l = 3/4 l = 750ml Estimate and measure capacity using appropriate units and equipment, including mixed units of measurement, and record using decimal notation, **in practical contexts** Use a range of scales for mass and capacity with increasing accuracy, reading and interpreting between marked divisions **(Possible link to Science Curriculum)**	Weight, mass, measure Kilograms, kg, grams, g Capacity, measure Litre, l, millilitre, ml scale, division, interval

5

Number Multiplication and division (Mental Methods)	5	Multiply numbers by ten, one hundred and one thousand (including decimal numbers) e.g. 0.9 x 100 = 90; 4.2 x 1000 = 420; 35.25 x 10 = 352.5; describe the effect using the language of place value **(See Mental Maths Policy)** Divide numbers by ten, one hundred and one thousand (including decimal answers) e.g. 850 ÷ 100 = 85; 463 ÷ 10 = 46.3; 3200 ÷ 1000 = 3.2; describe the effect using the language of place value **(See Mental Maths Policy)** Use knowledge of place value to derive doubles and halves of decimal numbers e.g. double 0.34; double 1.25; half of 1.68; half of 5.2 Solve problems involving **mental** multiplication and division, including scaling by simple fractions, e.g. A kilogram of apples cost £1.12. How much would ½ kg cost? How much would 5kg cost? A pencil costs 25p. What would 10 pencils cost? What would a box of 100 pencils cost? What would a crate of 1000 pencils cost? Recognise and use **square numbers** up to 12 x 12 and the notation for squared number (^{2}), e.g. 6^2 = 36. Identify square numbers on a times table grid. Know that a **prime number** has only two factors, itself and 1. Identify prime numbers up to 50 using knowledge of multiples and factors	Place value, digit, decimal place, decimal point Multiply, multiplication, times, product Divide, division prime number, multiple, factor, square number, squared (^{2})
Geometry Position and direction	5	Represent the position of a shape following a reflection, using appropriate language and know that the shape has not changed; complete a symmetrical pattern, e.g. on squared paper using one line of symmetry and extend to two lines of symmetry Using **co-ordinates in the first quadrant** describe and represent a shape following a translation and know that the shape has not changed, e.g. sketch the position of a triangle on a grid after it has moved 2 units to the left and 3 units up. Describe the new position using co-ordinates Plot a set of co-ordinates in the first quadrant to produce a simple picture or polygon (**Possible link to Christmas theme**, e.g. wrapping paper designs, snowflake symmetry) (**Possible link to Geography curriculum** for co-ordinates and directional language)	Reflection, symmetry, symmetrical, translation, co-ordinate, first quadrant, position

Additional weeks
To be used for:
- assessment, consolidation and responding to AfL
- additional using and applying activities
- Christmas maths activities

Produced for Southwark Primary Schools
